

Kimble Relates Palatka's Needs At Wire Meeting

W. J. Kimbrel has returned from the three-day conference held at Orlando, where there were one and fifty managers of branches of the Western Union Telegraph Company in attendance, and relates that the sessions brought out much valuable discussion. Each manager was called upon to tell how the service in his locality might be bettered and the patrons could be the more ably served. Mr. Kimbrel told his story along with the other speakers. His desire is to render the best possible service in a satisfactory manner, and it was to this end that many suggestions were made. Some of the high officials of the company were present and their remarks were intensely listened to.

Among matters taken up at the conference, says Mr. Kimbrel, "were the betterment of the service in Alabama, Georgia and the southern territory, and the improved cable service to Europe and South America. Under the new plans of the company, telegrams are now being transmitted in fifteen minutes between the principal points throughout the United States, and in fifteen minutes to London and Liverpool, and in twenty minutes to Rio de Janeiro, Santos, Montevideo and Buenos Aires in South America.

"Cable letter and week-end letter services have now been resumed to Great Britain and Ireland. Each form of service, in its own way, supplies a distinct convenience of which the cable using public will no doubt be quick to take advantage."

Palatka Library Has Many Books For Little Ones

This week is a happy one in libraries throughout America. It is a gala week, when librarians display delectable books for children and lists to aid in the choosing of good literature for the wee ones. The annual celebration of "Children's Book Week" is encouraged by all having the welfare of children at heart, and the book world is putting forth a special effort to make new and lasting friendships between books and children. A good book is a faithful comrade, and children who form the library habit meet new acquaintances who will prove enduring friends. At the Palatka library are to be found many delightful, many helpful books awaiting introduction to boys and girls.

Chats With Your Gas Man

If you are using defective gas tubing, discard it. Do not mend it. It is criminal carelessness to try to keep in use gas tubing that will permit even an infinitesimal amount of gas to escape, by patching it with tire tape, putty, rags, soap, bread dough, as has been shown upon investigation to have been done in many instances.

Worn-out gas tubing should be replaced by purchasing only the best grade of tubing. It may cost a few cents more, but it is worth it.

Ask for and insist upon having only the highest grade, for such tubing is absolutely odorless and will last longer than the inferior articles which are sold for a cent or two less per foot than the superior make.
